Objective

Design engineer bridging UI/UX design and frontend development, with hands-on experience in Figma, responsive web design, and AI-assisted design and development workflows. Seeking an internship to contribute to digital product work and build my experience.

Education

Bachelor of Science in Computer Science

University of Technology and Applied Sciences (UTAS) – Navrongo, Ghana

Date of Graduation: December, 2025

Experience

Teaching Assistant, National Service Personnel | UTAS

October 2025 – Present

- Tutored students in Python and Java programming fundamentals, translating technical concepts into accessible, structured lessons
- Supported operations at PITBIC, a university-based IT training and business incubation centre, including programme facilitation and applicant communications

Marketing Intern | AECINEMAX

June 2026 – August 2026

- Supported administrative operations and conducted research for the marketing team
- Researched Founders Fund Africa's creative economy funding programme and produced a workflow document outlining the application process
- Attended webinars on creative-economy funding and grant opportunities to inform internal knowledge-sharing
- Supported broader marketing efforts for the organization.

Internship | St. John Bosco College of Education

October 2024 – December 2024

- Utilized Adobe Photoshop to edit and prepare student ID cards for printing, ensuring high levels of accuracy and design integrity.
- Assisted staff with various IT challenges, resolving technical issues.

Skills

- Programming Languages: HTML, CSS, JavaScript, React (Fundamentals)
- Design Tools: Figma, Adobe Photoshop, Adobe Illustrator, Canva
- AI-Assisted Workflows: Claude Code (code generation), ChatGPT (image generation), GitHub Copilot (debugging)
- Soft Skills: Creative Problem-Solving, Self-Motivated, Collaborative, Good Communication
- Software Proficiency: Google Workspace, Microsoft Office Suite, Zoom

Additional Information

- **Languages:** Fluent in English Language.
- **Interests:** Creative design, Reading – Novels, Watching Movies (The Forge), Front-End Dev.
